PROJECTS

BlogVista, MERN STACK 📄

My blogging project utilizes React for the front-end, Node.js for the back-end, and MongoDB for the database. It offers user authentication, profile management, and CRUD operations for seamless blogging experience. It also includes comments sections

Bookie, React Js ,Node Js ,Mongo Db 📄

I have created a fully functional website for book collections that allows authors to post and manage their books. Users can easily browse and add books to their collection, while authors have the ability to showcase their work and interact with readers about their books.

Movie Booking Application,

Java Application 📄

This Java project is a movie ticket booking system that allows users to book tickets, store ticket holder details in a database, calculate ticket cost, cancel tickets, display booking history, modify ticket cost, and search for a ticket. It utilizes a MySQL database for data storage.
